Coil Hook without Counterweight CERTEX

Product information

The CERTEX coil hook without counterweight is designed for lifting and handling coils and similar loads through the coil eye. Its low dead weight allows the hook to be held level by hand during positioning, supporting controlled engagement with the load.

Available variants provide WLL capacities from 0.5 to 3 tonnes. Always select the appropriate WLL for the intended load and never exceed the stated WLL.

Best used for:

- Lifting and handling coils and similar loads through their central opening.
- Applications where manual positioning of the hook into the coil eye is required.

Product benefits:

- Low dead weight supports easier manual positioning and handling.
- Handle assists controlled guidance into the coil eye.
- Rounded tine supports smooth positioning during load engagement.
- Integrated lifting eye provides a defined connection point for lifting.
- WLL options from 0.5 to 3 tonnes support varied load requirements
