GP electric vacuum lifters for glass 400 V 50 Hz

Product information

GP electric vacuum lifters are specifically designed for horizontal transferring of glass plates. GP…RB are also for manual rotation or swivel.

Properties

- Elephant GP types driven by an electric vacuum pump

Safety

- Vacuum reserve buffer prevents dropping.
- Acoustic signal in case of loss of pressure.
- Safety handle for an adequate clearance.
- Manometer, vacuum control.
- Acoustic signal includes rechargeable batteries and battery charger.

Advantages

- Ergonomic handling by one person.
- Almost maintenance-free.

Option

- GP types are also available with electric rotation and tilting.
- GP types are also available in 230 VAC and 24 VDC versions.

IMPORTANT

- Allways mention right dimensions of the load L x W x H.
