

Wire Rope Stocking RP 100

Product information

Cable and rope stocking.

These stockings provide a strong and reliable tensile connection when they are fixed to the cable, rope or pipe front end. When routing through cable channels, open trenches, on trays or other installations – this mesh of galvanized steel strands, closed on one side and fitted with a respective clamp and thimble, have a special arrangement of the mesh sizes (relative to the respective diameter) ensure a high flexibility and adhesion on the material to be inserted and thereby an unproblematic insertion.

Part code	Rope Ø range	Length mm	Delivery time
140601500520	8-15	1,250	30
