

## Wire Rope Stocking RP 200

### Product information

Attached at any point of a cable, rope or pipe, these stockings can be safely pulled over with a pull rope. Whether pulling in cable channels, open trenches, on trays or any other installations, this mesh made of galvanized steel in a weave open at both ends is fitted with the respective clamps and thimbles can be used to pull in the cable etc. as required. Of course, the proper mesh size guarantees a high flexibility and adhesion.
