BigBag Lifting Beam - BBT

Product information

The lifting beam of the BBT series is designed for lifting BigBags. On the crane side, it has an eye suspension for single hooks in accordance with DIN 15401. On the load side, the loops of the BigBag are placed over four round bars. The loops are prevented from slipping out by the shape of the adjacent sheet metal. The lifting beam is supplied in the colour RAL 3000 (fire red) as standard, but other colours are also available on request. You can also send us an enquiry for other intermediate sizes and load capacities.
